Texzon knows Energy Savings!

Texzon takes the guesswork – and the hassle – out of choosing your electric/gas provider. As your impartial advocate, Texzon leverages its long-term relationships with the most respected power providers and negotiates the lowest, best rate for now, and for the long term. With multiple providers competing for the lowest rate, Texzon customers win! Texzon's successful combination of industry experience and outstanding customer service has resulted in many satisfied customers.

Deregulation gives businesses the power to choose and by doing so, our customers can see significant savings of between 10-25% in their electric bill. In many states across the country businesses can purchase their energy from a number of different providers as opposed to just the traditional Public Utility Company.

Texzon Benefits/Highlights:

- Texzon simply supplies the electricity that's delivered to you from your utility company who owns the grid power lines.
- You are not switching utility companies; there is no rewiring, no interruption, no new meters and no hidden costs or maintenance fees.
- You are not obligated to long term contracts and every month we prove our savings to you.
- Agreement is month to month with no cancellation fees.
- Enrollment is easy and absolutely free.
